

Tankumsee Adventure Tower

Isenbüttel, Germany

The Location

The Tankumsee Adventure Tower is on the 220-hectare Tankumsee recreation area. The 62-hectare lake and the idyllic pine forests offers attractive recreational and leisure opportunities for the whole family. Isenbüttel was awarded the title "Family-friendly place" by the Lüneburg Heath Tourism Association. The location is operated by Erlebnistrum Tankumsee GmbH.

The Attraction

The Adventure Tower was built at Lake Tankum to create a new, attractive highlight in the southern heath. Tankumsee sought to provide new fun activities to all age groups. Built by KristallTurm, the tower has a height of 25 meters and a diameter of 12 meters, offering different levels of difficulty on three levels with 36 climbing stations. An adrenaline kick is guaranteed with the giant swing, which can be raised to 8 meters. With the rope slide FlyingFox (zipline), participants fly 200 meters over the Tankumsee and 200 meters back again... by far one of the "coolest" experiences at the Tower. An observation deck is available for events, including concerts and birthday parties.

Target Audience

While the operators thought that the tower would only appeal to children and young people, they have found that many "young at heart" also want to experience something different and treat themselves to time on the Adventure Tower. Corporate and group experiences are another potential audience, as well as class trips.

Why LockD Clips?

The safety-related consulting by KristallTurm Safety & Service convinced the operators that LockD Clips was the best choice for their tower. As a new system, LockD Clips seemed the most appropriate.

Erlebnistrurm Tankumsee GmbH Managing Director Annette Böhme feels that the LockD Clips system was "a good choice, because it conveys security to the guest and is actually safe."

"The system is easy to operate and is also well received by participants. The guests feel safe."

- Managing Director Annette Böhme

She continues, "the system is easy to operate and is also well received by participants. The guests feel safe."

It was also important that the operator had high acceptance of the safety system from the team that would work with it.
