

LockD Clips ROCKS

LockD Clips™ ROCKS takes the adventure industry's most advanced integrated carabiner system and applies it to improving the safety of via ferrata courses.

**Better for operators.
Better for climbers.
Always LockD.**

**LockD Clips ROCKS is the industry's most advanced
via ferrata smart belay system**

The LockD Clips ROCKS system brings via ferrata operators peace of mind, as they can rest assured that climbers cannot unclip from the safety line once they start the course. The clips also incorporate a shock absorber for added protection.

EQUIPMENT**

Better for Climbers.

- **Tweezles mark the spot:** Climbers see the Tweezle key and intuitively know where to clip their carabiners.
- **Streamlined clip design:** Climbers will appreciate the design, which is light and easy to operate.
- **Made for small and large hands alike:** A slenderized carabiner fits easily into any size hand.
- **Ideal for first-time climbers... and pros:** The design is so simple that there is virtually no learning curve for first time-climbers. But even the most experienced climbers and staff will appreciate the undeniable safety and, thus, enjoy the climbing experience.
- **Expands the age range for via ferrata course use:** Knowing that kids will always be clipped in on the course, age restrictions can be expanded or kids can climb without an accompanying adult.

Better for Operators.

- **Peace of mind:** Rest assured that climbers cannot unclip from the safety line and are always clipped in. LockD Clips ROCKS also provide added shock absorber protection in case of an unintentional fall.
- **Minimized wearing parts:** Get greater reliability and longevity from your equipment.
- **Onsite maintenance and annual inspection:** Inspection can be done locally as part of your normal annual course inspection process. Many repairs are extremely simple and can be done in the field as well.
- **Reduced annual inspection costs:** With annual third party inspection handled onsite by a qualified PPE inspector, there is minimal out of service time and no shipping costs.
- **Seamless integration:** The LockD Clips system integrates seamlessly into existing courses, so equipment can be upgraded with ease.

Always LockD.
