

# LockD Clips

Introducing LockD Clips™, the next evolution of "always locked" smart belay systems, designed specifically for the needs of adventure recreation operators and participants.

**Better for operators.**  
**Better for climbers.**  
**Always LockD.**

**Demo units  
available**

**LockD Clips is the industry's  
most advanced integrated  
carabiner system**

Feedback from the adventure recreation industry has informed the streamlined, innovative design of the LockD Clips integrated carabiner system, making it the most advanced on the market.

## Better for Climbers.

Climbers will appreciate the streamlined clip design, which is **light and easy to operate**. A slenderized carabiner fits easily into small and large hands alike.

The design is so simple that there is virtually no learning curve for first time climbers. But even your most experienced climbers and staff will enjoy their climbing experience too.

## Better for Operators.

The streamlined design benefits operators as well. Minimized wearing parts mean **greater reliability and longevity** of your equipment.

Inspection can be done locally as part of your normal course inspection process. Any adjustments or repairs are extremely simple and can be done in the field as well.

Operators enjoy **reduced annual inspection costs** with LockD Clips. With annual third party inspection handled onsite by a qualified PPE inspector, there is **minimal out of service time and no shipping costs**.

The LockD Clips system **integrates seamlessly** into existing SSB systems, so clips can be upgraded all at once or over time as your SSB clips are retired.

*"We decided to get the LockD Clips because our previous clip system was always in repair mode. So far the LockD Clips work great. Customers like them a lot. They are way lighter and have a very audible click when they unlock. Customers also like that they are simple to open. We would recommend them. In fact, we just placed an order for some more!"*
